LED BLINKING

Aim → Turn ON the LED ON for a second, then off for a second, repeatedly

Hardware Required

→ Arduino Board.

→ LED

→ USB cable

→ wires

Code:

```
void setup()
```

```
{
```

```
  pinMode(13, output);
```

```
}
```

```
void loop,
```

```
{ digitalWrite(13, HIGH);
```

delay(1000); // wait for 1000 milliseconds

digitalWrite(13, LOW);

delay(1000); // wait for 1000 milliseconds
